

Remo Ruffini is Professor of Theoretical Physics at the University of Rome "La Sapienza" since 1978. He is President of the International Centre for Relativistic Astrophysics (ICRA) and he created an international organization in which several states collaborate in the field of astrophysics (ICRANet). He also initiated the International Relativistic Astrophysics Ph.D (IRAP), a common graduate school program of several European universities for the education of theoretical astrophysicists; moreover, he started the IRAP Ph. D. Erasmus Mundus, the first doctorate in Astrophysics sponsored by the European Commission.

Chair: Prof. Renxin Xu

Talk: ON THE STEPS OF GALILEO-XUGUANGQI TO NUCLEI AND STARS

Abstract: In the best tradition of East and West scientific collaboration historically started by Galileo and XuGuangqi. Progresses in Relativistic Astrophysics on Neutron Stars and Black Holes are highlighted with most significant contributions from East and West.
